## CORE FUNCTIONALITY

### Centralized Data Storage

- Real-time data synchronization across departments
- Single source of truth for all business data
- Automatic updates visible to all users

### Inventory Management

- Multi-location visibility
- Real-time stock level tracking
- Low stock alerts and notifications
- Batch and serial number tracking
- Barcode scanning support

### Accounting & VAT Compliance

- UAE VAT calculation at product level
- VAT-compliant invoice generation
- Secure document storage (5+ years)
- Automatic VAT return preparation
- FTA integration ready

## SALES & CUSTOMER MANAGEMENT

### POS Integration

- Unified sales from all channels (POS, online, B2B)
- Offline mode functionality
- Automatic sync when back online
- Multi-currency support

### CRM Capabilities

- Customer profile management
- Purchase history tracking
- WhatsApp integration for notifications
- Personalization features
- Customer segmentation

## PROCUREMENT & SUPPLY CHAIN

### Purchase Management

- Purchase order creation and tracking
- Supplier database management
- Payment cycle monitoring
- OCR-based invoice automation
- Multi-supplier comparison

## SECURITY & ACCESS

### Workflow Automation

- Approval workflows
- Role-based access control
- User permission management
- Audit trail capabilities

## INTEGRATION & SCALABILITY

### Third-Party Integration

- E-commerce platform connectivity
- Payment gateway integration
- Shipping provider links
- API availability

### Reporting & Analytics

- Customizable reports across all modules
- Real-time dashboards
- Store/location-wise filtering
- Export capabilities (Excel, PDF)

### Cloud Deployment

- No on-premises infrastructure needed
- Automatic updates
- Scalability without overhaul
- Mobile access

## Business Model Fit

1

- Supports your industry (retail, distribution, manufacturing, services)
- Handles your business size and transaction volume
- Accommodates multi-location operations if needed

## Integration Capabilities

2

- Compatible with existing tools
- API documentation available
- Integration support provided

## Vendor Experience

3

- Prior UAE implementations
- Industry-specific experience
- Reference customers available
- Local support team

## Usability

4

- Intuitive interface
- Training provided
- Mobile-friendly
- Arabic language support (if needed)

## Business Value

5

- Clear ROI timeline
- Pricing transparency
- Implementation timeline defined
- Post-implementation support included

## Final Decision Matrix

Criteria	Score
System Name:	_____
Overall Score:	____/100
Features Score (40 points):	____
Integration Score (20 points):	____
Vendor Score (20 points):	____
Usability Score (10 points):	____
Value Score (10 points):	____

### Notes
